-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 15-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushashi et al. US 4,939,239, in view of McGinley et al. US 5,462,761.

Matsushashi teaches a preparation comprising hyposensitization agent covalently bond to a saccharide having an average molecular weight in the range of 500-10,000,000 useful for the treatment of allergy, such as cedar pollen allergy (column 1, lines 54 through column 2, lines 1-24). Matsushashi teaches saccharide helps prevents an anaphylaxis and facilitates the preparation of a more effective preparation for the treatment of allergy (column 2, lines 20-24). Saccharide includes glucomannan (id). The preparation can be formulation into tablet, troche, ophthalmic solution, intranasal nebula, cream and lotion (column 3, lines 58-64).

Matsuhashi does not explicitly teach the average particle size of glucomannan.

McGinley teaches the use of glucomannan in food products (abstract; and column 3, lines 8-53). Glucomannan derived from konjac, and intimately mixed with microcrystalline cellulose to obtain aggregate particles having average particle size of 0.1-100 μm (column 2, lines 1-65). Thus, it would have been obvious to one of ordinary skill in the art to modify the preparation of Matsuhashi using the particle in view of the teaching of McGinley, because McGinley teaches the use of glucomannan having small particle size is known in the art.

Pertinent Arts

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Motozato et al., and Kawano are cited as of interest for the teachings of glucomannan in diet and packing products.
